Mounts ■

Full Coverage:

25 years of trucks & SUVs

Chevy • GMC • Ford • Dodge • Jeep

Nissan • Toyota

Half-ton through Ton-and-a-half

You can buy cheaper, but you can't buy better

- **Material** - Full-size truck chassis mount sub frames and winch mounts are 1/4" steel throughout with 3/16" outer wings. Jeep products feature 3/16" winch and chassis mount sub frames with 1/8" outer wings.
- **Weight** - Optimized strength to weight - base bumpers approximately 170 lbs
- Winch capacity - bumpers are designed for winches up to 16,500 lbs pulling power with standard 4 1/2" x 10" bolt pattern.
- **Winch Access** - Functional access to controls and cable through 4" x 20" opening on top of bumper (not found in other brands!)
- **Powdercoat** - The best double coat. Full sandblast, acid etch, primer coat, and top coat. Mini-tex black is a semi-flat lightly textured finish. (not found in other brands!)
- **D-ring mounts** - designed for 1" shaft shackles
- **Light ports** - Quad ports with universal fitment for most 6" and 4" lights - typical post mounts (not found in other brands!)
- **Cooling Inlets** - Large airflow to the radiators essential for diesel performance (not found in other brands!)
- **Mounting** - Frame Mounts are independent from bumper allowing adjustment up and down and side to side for a perfect fit every time (not found in other brands!)
- **Styling** - Aggressive compact shape. As small as possible while maintaining fully enclosed winch capacity. Soft, rolled edges compliment OEM styling.
