Metal Carb Can Conversion Kit
BLI-33710

This kit converts our original metal jerry can into an emissions control can by creating compatibility with our 3000 Series Sure Pour Spout. This spout is safe, clean, and easy to use while also protecting the environment. It seals your container when stored and shuts off automatically when fuel tank is full to prevent leakage and spills. Adapts for numerous applications and is recommended for fuel containers having capacity less than 2.5 gallons.

Unit Dimensions
7.00"x 3.50"x 3.50"
