Stainless steel nerf bars give a vehicle the rugged, stylish, off-road look. Besides offering a functional step the bar also protects against low-lying vegetation and debris while off-road.

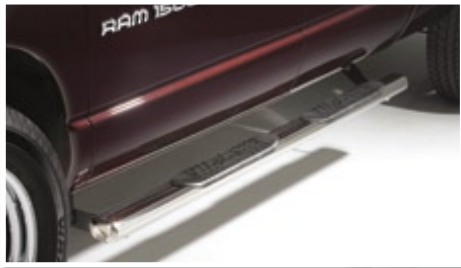

Key Features:

- Chrome-Like Mirror Finish
- The highest Quality 16 gage 304 polished Stainless Steel Tube
- No Drill Installation with model specific brackets (A complete bracket system is provided, along with case-hardened nuts and bolts to ensure an extremely sturdy, time-saving and trouble-free mount)
- Custom molded plastic step plate
- Standard Cab Length Configuration

STAINLESS STEEL OVAL NERF BARS

ICI's superior quality truck bed treatments are highly effective in protecting against scratching, dents and other damage.

New "Bullet 4" Oval Step Tubes by ICI offer a sharp alternative to traditional Nerf Step Bars. Constructed of highly polished, aircraft grade 304 stainless steel tubing, their flattened oval profile offers a wider step surface than standard 3" nerf bars. The Oval Step Tubes come with sports matching polished end caps and wider, molded black plastic step inserts. Heavy-duty mounting brackets are powder coated to give extra protection against harsh weather conditions and road salts, and bolt directly to factory supplied mounting holes on most applications. Oval Step Tubes are sold in pairs, and include ICI's limited lifetime warranty against manufacturer defects.

- Polished stainless steel for great looks and long life
- Wider 4" step surface
- Custom molded black plastic step inserts
- Custom designed, "no-drill" brackets (most applications)
- Limited lifetime warranty
